Engineers' Path to Entrepreneurship utilizing IT Incubator

Seminar Theme:

With the growth of economy and the governments' enthusiasm in ICT and Digital Bangladesh, it is important to create leadership in IT sector in Bangladesh. As a prominent Engineering and Technology University, KUET has been successfully producing skilled engineers for decades who are well known for their skill, capacity and integrity both locally and internationally. Following that legacy, it is high time that KUET students with technologically advanced knowledge joined the glorious path of leadership and entrepreneurship in Bangladesh. The goal of daylong seminar is to connect with successful entrepreneurs who can educate the students about IT Entrepreneurship so that they can learn from the bests and later contribute to country's economy using IT Incubators and Training Centers developed by Bangladesh Hi-Tech Park Authority (BHTPA).
