please go to [INASP registration database](#) and select your country and institution.

**Usage data**

For the Library/Customer Administration area, we have matched Synergy and Wiley InterScience accounts so you will be able to manage all your Wiley and Blackwell journals using your existing Wiley InterScience Administrator login. If you do not already have a Wiley InterScience administrator ID, you will receive further instructions after the transition.

From September 2008 onwards, usage data for Blackwell journals will be available on Wiley InterScience, presented in a separate report but in the same format as that offered for Wiley journals.

the same format as that offered for Wiley journals.  
Usage data for Blackwell journals for the period prior to December 2005 will not be transferred to Wiley InterScience and will no longer be available.

# What is to be done

- Initial registration - done
- Updating
  - particularly when there is a **change** of
    - **contact person**
    - **IP**
- Registering for **newly included resources**
  - This can happen **several times a year**
  - And of course, **at the beginning of a year**

# Setup

- When the publisher notifies you, **check first** that it is working
- Try to learn about the range of access
  - Are **any titles excluded**?
  - How many **years of back file access**?
- Add **a link to the new resource** to your library journals webpage
- **Notify your users**

# Helping your users

- Users need help in **finding** resources and **accessing** them
- To assist them we need to
  - Know the resources very well
  - Know the coverage
    - Exclusions
    - Date range accessible
  - Know the alternatives

# Knowing our resources

- We need to familiarize ourselves with the browsing / searching of our resources
  - It can be difficult to find something that is available, within reasonable time
  - Some presentations here
  - But then we have to spend some time ourselves just browsing our resources, because the setup a little bit different for every resource

*This will be the focus of the next presentation*

# Knowing the coverage

## ■ Title exclusions

- Some publishers exclude some titles
  - In 2008 Nature gave us access to 66 of their 72 titles
- Some gateways also carry journals from other publishers - not always covered by our license
  - Blackwell-Synergy could not give us access to Econometrica (Econometric Society) etc.

# Knowing the coverage

## ■ Date range covered

- Usually 5/10 years of backfile + current
- Only APS and Annual Reviews gives access to full archive
- EBSCO
  - gives access to backfile going much further back, but
  - has 6 or 12 month embargoes on most titles
    - you don't get current issues

# Knowing the alternatives

- The **same title** may be available in **two different places**
- When you can't access something, consider
  - **EBSCO**
  - **OARE, AGORA, HINARI, eJDS etc.**
- These are to be covered later
